

Uniform Shop Report – P&C 08 June 2021.

The initial rush of Term 2 is over and both online orders and foot traffic is slowing down. I will be once again only opening the shop 2 times per week during term 3 and Flexischools orders will continue to be delivered on Wednesdays.

Merchant Services

The EFTPOS machine continues to be temperamental. I have contacted merchant services regarding the best way forward and alternative plans, they have suggested that we wait until merchant owners are updated before proceeding, I have a contact I am working with to do this and will be sending through all the information required and the approved minutes from last meeting as soon as practical.

Stock Supplies

Stock supplies are good currently. A new polo order is underway, with a current delivery date at the end of August.

Indent orders are now all confirmed with deliveries to occur in Term 4 and Term 1.

POS

I have been using the new version of the POS for the last 2-3 weeks and it seems to be working well

Flexischools Alternative

I have reached out to a contact at West Pennant Hills to discuss the backend process for Qkr! I will provide further information when available.

I have also been looking at the eCommerce capability that comes with our current POS which uses Stripe for transactions. I have some questions to the developers regarding checkout customisations that would need to be implemented if we were to consider this option. The transaction fees from Stripe also appear to be higher than ongoing fees from Qkr!.
